ACADEMICS PROJECTS

- **Controlling a Robot using a Bluetooth**
 - It basically deals with controlling a robot using Bluetooth without using any sort of programming.
 - It has been developed using IC-MT8870(DTMF Decoder) and IC-L293D (Motor driver).
 - Using a DTMF in the mobile the robot can be easily driven.
- **Face Recognition System for Exam Hall Entrance**
 - This is a secured means of entrance for exam hall where students will be allowed to enter the hall only when the face matches the data base.

- We have used python for programming in raspberry-pie module 3b+.
- Data bases of students will be stored in the system and trained once the student is in front of the pi camera it tries to recognize his face and match with the data base, once its matches he will be allowed to move into the exam hall.

SKILLS AND KNOWLEDGE

- Basic level of proficiency in Microsoft Office and PowerPoint Presentation.
- Understanding & Knowledge of Computer Languages like C, C++ and Python.
- Concepts of networking(R&S)
